About

B.Tech Computer Science graduate with 6 months of internship experience in data cleaning, SQL reporting, and Power BI dashboard development. Skilled in Python, MySQL, Advanced Excel, and ETL pipelines. Seeking a full-time Data Analyst role to deliver business intelligence insights and support data-driven decision-making. [↗](#)

Internship

Data Analyst Intern - Asian Technology Solutions Dec 2025 – May 2026 | Madhapur, Hyderabad

- Performed data cleaning and preparation on client datasets using Excel and Python, handling duplicates, and inconsistencies to ensure data accuracy and identified root causes of data quality issues.
- Wrote SQL queries to extract and summarize data from internal databases, supporting weekly reporting and ad-hoc analysis requests
- Developed and maintained Power BI dashboards to track key business metrics, enabling teams to monitor performance trends on a weekly basis

Projects

Chocolate Sales Analytics Dashboard | Microsoft Power BI , Excel [↗](#)

- Built an interactive Power BI dashboard tracking 4 KPIs (Total Sales, Profit, Shipments, Profit %), using a data model with 5 related tables ,replacing manual Excel reporting.
- Cleaned and transformed raw shipment data using Power Query, handling missing values, and changed data formats to achieve 100% data consistency.
- Designed a Star Schema (1 fact + 4 dimension tables) and 7 DAX measures including YoY/MoM growth using time intelligence functions.
- Identified seasonal insight: sales peaked Feb–Apr and Dec, enabling data-driven decisions on inventory and marketing.

Customer Shopping Behavior Analysis Project | Python, MYSQL, Power BI [↗](#)

- Built end-to-end ETL pipeline on a 3,900-transaction dataset and cleaned missing values using median imputation by product category and 2 Feature Engineering.
- Loaded cleaned data into MYSQL and ran SQL queries across 3 KPIs (total revenue, avg review from customers and purchase amount) to surface actionable business insights.
- Uncovered that loyal customers drove the majority of revenue and express shipping users had a significantly higher average spend per order.
- Delivered interactive Power BI dashboard visualizing revenue trends, product performance, and customer segments, enabling data-driven decision-making across marketing and retention strategies.

Technical skills

Programming: Python, SQL

Databases: MySQL ,Postgresql

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Data Analysis & BI Tools: Power BI, Advanced Excel

Techniques: Data Cleaning, EDA, Data Visualization, Dashboard Development, KPI Analysis

Education

B.Tech: Computer Science & Business Systems SRKR Engineering College, Bhimavaram	2025 7.7 CGPA
Intermediate: Pavan Junior College, Vizianagaram	2021 753 Marks
10th: Vishnu School , Bhimavaram	2019 67%

Certificates

- Career Essentials in Data Analysis — Microsoft & LinkedIn (2026)
- Power BI for Beginners — Great Learning [↗](#) (2026)
- Complete Microsoft Excel A-Z — Udemy (2025)
